

TCP2201 Object Oriented Analysis and Design

Lab 9 – Android

Lab outcomes

By the end of today's lab, you should be able to

- Create your first Android program

Exercise

Download and install the appropriate Android Studio for your operating system from <https://developer.android.com/studio>

Then follow the tutorial at <https://developer.android.com/training/basics/firstapp/> to build your first Android App until you get to this page:

You do not have to run this in a real phone for this tutorial – the emulator is sufficient.

What to hand in

Type your full name in My First App and screen shot it and hand in that screen shot in MMLS.

Please also name the picture file with your full name so that when I download all the screenshots in one go, I can see immediately from the file name whose screen shot it is.
